

Center for Mineral Metabolism Clinical Research – Active Studies

Short Title	Study of Insulin Resistance in Stone-Formers, Diabetics and Normal Controls
Study Number	0496-114
Study Title	Pathophysiology of Gouty Diathesis and Uric Acid Nephrolithiasis: Role of Insulin Resistance
Disease/Condition Under Study	Kidney Stones
Brief Description of Study	Nine day study including a 5-day inpatient stay.
Participant Eligibility	Age: >21 years old
	Uric Acid Stone formers, non-stone formers with type 2 diabetes, and normal volunteers
	Excluded: Those with chronic diarrhea, renal disease, liver disease
Study Drug	N/A
Study Doctor	Khashayar Sakhaee, MD
Location	Clinical Trials Office in the Aston Center
	Clinical and Translational Research Center
