

Assistant/Associate/Full Professor – Nephrology (04180)

Division of Nephrology seeks MD and/or PhD for Assistant/Associate/Full Professor who will establish a research program in podocyte biology and glomerular disease. We seek individuals who will take advantage of the considerable scientific and clinical resources at UT Southwestern to help build a multidisciplinary program dedicated to glomerular biology and disease. Investigators with expertise in podocyte cell biology, extracellular matrix, and/or genetics are particularly encouraged to apply. Successful candidate will participate in the educational and clinical activities (if appropriate) of the division. Interested candidates should email CV, description of research, and names of three references to Peter Igarashi, MD at peter.igarashi@utsouthwestern.edu or via mail to

Nephrology Division
UT Southwestern Medical Center
5323 Harry Hines Blvd
Dallas, TX 75390-8856

Department of Internal Medicine

Assistant/Associate Professor – Nephrologist (07370)

The Department of Internal Medicine, Division of Nephrology, is seeking an Assistant/Associate Professor. Applicant must have an M.D. degree or equivalent, from an approved LCME medical school and satisfactory completion of an Internal Medical residency and a nephrology fellowship from an ACGME-accredited program. Level of appointment will be commensurate with experience. Candidate must be eligible for Texas medical licensure and be board certified/eligible in Internal Medicine. Board certification/eligibility in Nephrology is preferred. Duties will include nephrology patient care activities with emphasis on dialysis and/or transplant care, teaching and training of medical students, house staff, and fellows.

Qualified applicants should send cover letter, curriculum vitae, and three letters of reference to:

Assistant/Associate Professor – Nephrology (09-115)

THE UNIVERSITY OF TEXAS SOUTHWESTERN MEDICAL CENTER AT DALLAS–
The Department of Internal Medicine, Division of Nephrology, seeks faculty at the Assistant/Associate Professor level who will develop laboratory or translational research programs in an area of kidney biology or renal disease. Individuals with expertise in glomerular biology or diseases and are eligible for Endowed Scholars or Disease-Oriented Clinical Scholars Programs are particularly encouraged to apply. Successful candidates will benefit from core facilities provided by the UT Southwestern O'Brien Kidney Research Core Center (NIH P30DK079328). Applicants must have an M.D. degree or equivalent and be board certified or board eligible in Internal Medical and Nephrology; however, outstanding candidates with Ph.D. will also be considered. Extramural funding is expected for appointment at the Associate Professor level. Duties will be primarily research but will also include patient care and teaching of medical students, residents, and fellows.
