

Prepared pages you can link to

We've got good news on how you can cut down on your Web workload. How, you might ask? Simple!

There are many pages on the UT Southwestern Web site that have already been created and are updated by Internet Services and the Office of News and Publications. So you don't have to. No more updating of general UT System or UT Southwestern information, no separate faculty bio lists, school intros, career information or lengthy details about Dallas/Fort Worth. We've already handled that for you. This allows us to maintain accurate and consistent information throughout UT Southwestern's Web site and means a lot less work for you!

If you want to feature information on one of the pages listed below, all you have to do is simply browse links for them to put in your left navigation or quick links areas. That's right! You do **not** need to re-create the following pages:
