**STUDENT SKILLS LAB  
BLADDER CATHETERIZATION**

**Objective:** To demonstrate proficiency in bladder catheterization in male and female models with correct aseptic technique.

**Steps in Procedure:**

- Open tray
- Put on gloves
- Betadine on swabs
- Open water soluble lubricant
- Test Foley catheter balloon
- Explain procedure to patient
- Drape the genitalia
- Prep the patient
- Dip tip of catheter in water soluble lubricant
- Insert full length of Foley catheter
- Observe urine return in catheter
- Correct inflation of balloon

<b>Performance:</b>	<b>Correct</b>	<b>Error</b>
<b><i>Aseptic technique</i></b>		
Putting on gloves		
Handling tray and instruments		
Preparation of patient		
<b><i>Male catheterization</i></b>		
Order of steps		
All steps completed		
Depth of insertion		
Correct inflation of balloon		
<b><i>Female catheterization</i></b>		
Order of steps		
All steps completed		
Depth of insertion		
Balloon inflation		

**Proficiency:** Procedures completed with no errors

Remediation given at time of testing.
