

Confirmation of Undergraduate and/or Graduate "Chemistry and Biochemistry" Course Hours

Rationale: Eligibility requirements for the board examination in Clinical Chemistry administered by the American Board of Clinical Chemistry (ABCC) include, but are not limited to, "satisfactory completion of a minimum of 30 semester hours (or equivalent) in undergraduate and/or graduate level chemistry or biochemistry courses taken at institutions acceptable to the Board." With your application materials to the UT Southwestern Clinical Chemistry Fellowship Program, please include an "official" copy of all transcript(s) that you will use to document fulfillment of this ABCC requirement in the completion of this form.

Instructions:

In the section below entitled, "Chemistry and Biochemistry Courses Meeting Minimum of 30 Semester Hours," indicate the course code, complete course title (**do not abbreviate**), and a "brief," but informative, description of the course content for all coursework that you have completed with a grade of "C" (2.00), or better, that you believe constitutes a "chemistry" or "biochemistry" course. After receiving this completed form, we will evaluate your coursework and determine if it meets the minimum requirements established by the ABCC for eligibility to take the board examination in Clinical Chemistry. **If necessary, use additional copies of this sheet.**

Name: _____

Chemistry and Biochemistry Courses Meeting Minimum of 30 Semester Hours

IMPORTANT: Please include an **official** copy of your transcript, containing the courses listed below, with your application.
