

Educational Goals & Objectives for Ophthalmology Residents at John Peter Smith Hospital (JPS)

PGY2 Residents (2)

GOALS – The residents will learn to provide general ophthalmology medical care in a compassionate and professional manner.

OBJECTIVES

By the end of this rotation, the residents will display the following proficiencies:

- Ability to perform complete ophthalmic examination, use information thus obtained to diagnose and treat common ophthalmologic problems, and refer common surgical problems to senior residents.

PGY3 Resident

GOALS – The resident will learn phacoemulsification skills, performing his/her first phaco cases at JPS. In addition to continuing to develop medical ophthalmologic care skills, the resident will also be able to perform oculoplastic and strabismus surgeries.

OBJECTIVES

By the end of this rotation, the resident will display the following proficiencies:

- Ability to perform phacoemulsification with IOL with reasonable skill and in reasonable amount of time under faculty supervision.
- Demonstrate appropriate level of skill in ophthalmic surgical procedures other than cataract extraction (e.g. strabismus, oculoplastics).
- Demonstrate appropriate level of ophthalmic knowledge and skills related to diagnosing and treating common ophthalmologic diseases and conditions.

PGY4 Resident

GOALS – The resident will learn to perform complex surgeries in addition to continuing to develop medical ophthalmologic care skills.

OBJECTIVES

By the end of this rotation, the resident will display the following proficiencies:

- Ability to perform phacoemulsification with IOL on complex cataract cases with reasonable skill and in reasonable amount of time under faculty supervision.

- Demonstrate appropriate level of skill in ophthalmic surgical procedures other than cataract extraction (e.g. strabismus, oculoplastics).
- Demonstrate appropriate level of ophthalmic knowledge and skills related to diagnosing and treating common ophthalmologic diseases and conditions.
- Ability to perform upper lid blepharoplasty and ptosis repair.
