

The University Hospitals, offer comprehensive nursing internships in the clinical discipline of your choice.

Our nursing internships meet the needs of the graduate nurse and also the experienced RN interested in change in clinical focus. The internships provide the combined dynamics of concentrated instruction and hands-on experience. UT Southwestern Medical Center's excellent service supports patients, and families in a technologically advanced environment. The University Hospitals specialize in transplantation programs (heart/lung, kidney/pancreas & bone marrow), neurosurgery, oncology and more.
